

SEN381 CivicConnect

Milestone 2 — 3 Person Work Split

Based on the official Milestone 2 brief. This document allocates primary ownership while maintaining shared engineering accountability.

Person 1 — Architecture & Quality Drivers

Owns system architecture and PED evolution.

- Review and update PED v2.0 from M1
- Architecture Significant Requirements (ASRs) & quality drivers
- Architecture alternatives and justification
- Logical architecture diagrams
- Architecture ADRs
- M2 baseline sign-off
- Update RTM architecture columns

Person 2 — Data, Persistence & Technology

Owns database and technology decisions.

- Initial ERD / data model
- Entity relationships & ownership
- Persistence decisions and database justification
- Technology stack comparison & selection
- Deployment compatibility assumptions
- Technology ADRs
- Update RTM data & technology columns

Person 3 — Design, Development & Governance

Owns implementation evidence and repository governance.

- Two genuine design problems
- Final design-pattern decisions (A2 informed)
- Interface / API decisions
- README & application documentation
- GitHub governance & repository evidence
- RTM implementation & verification columns
- Risk Register and AI Register updates

Shared Responsibilities (All Members)

- Review PED v2.0 for consistency
- Proofread formatting and grammar
- Maintain Harvard references and citations
- Update RTM for individual sections
- Use feature branches and meaningful commits
- Review teammates' Pull Requests
- Participate in ADR discussions
- Verify AI-assisted work
- Prepare the presentation
- Be able to defend every artefact

Final Artefact Ownership

Artefact	Primary Owner
PED v2.0 Continuity	Person 1
ASRs & Architecture	Person 1
Architecture Diagrams	Person 1
ERD / Data Model	Person 2
Persistence Decisions	Person 2
Technology Selection	Person 2
Design Pattern 1	Person 3
Design Pattern 2	Person 3
README & Technical Docs	Person 3
RTM Evolution	Shared
Risk Register	Person 3
ADRs	Shared
Presentation	Shared

Suggested Presentation Split (12-15 minutes)

Member	Topic	Time
Person 1	PED evolution, ASRs & Architecture	4 min
Person 2	Data model, Persistence & Technology	4 min
Person 3	Design patterns, GitHub, RTM & Development	4-5 min
